

Purivox bird/wildlife control cannons

Purivox Carousel Triplex V Rotatable gas cannon

Self-rotating, electronic gas banger with a 3 shot bursts.

By the back force of each shot the blast tube will rotate and so each shot is fired in a different direction to cover **360° around the unit**. The rotation effects that every shot has a different sound level for the birds, which increases the scaring effect even further. Even the rotation itself, scares the birds and so the combination of rotation and loud shot is a very efficient way of controlling the birds.

The Carousel Triplex V gives proven crop protection for around **4 to 5 hectares**

Purivox Triplex V Gas cannon

Stationary electronic controlled gas banger with a 3 shot bursts. With the shot-volume of around **86 decibels at a distance of 100 meters** this model covers an area of **1 to 2 hectares**. The shot-volume can be regulated by the length of the megaphone. Thanks to its construction it can be easily transported from place to place to increase the effectiveness.
